

Manishankar Dey

+91 8421731957 | email-manishankardey2005@gmail.com | github.com/UnixManish2005 | linkedin.com/in/manish2005

AI/ML professional with 12 months of experience across Data Science, AI training, and MLOps, skilled in building, deploying, and optimizing machine learning models for real-world applications.

EDUCATION

Savitribai Phule University, MCA in Data Science | Pune, India CGPA: **- / 10** June 2026
Gondwana University, BSC in Computer Science | Chandrapur, Maharashtra CGPA: **8.0 / 10** July 2024

Project Competition Winner: Sexual Violence Prediction ML APP & Research Paper for Women's Safety
Conference: IRJMETs, SIBAR Pune
Courses: Python for Data Science |Delloite, TATA Group, BCG-X , British Airways Data Science Job Simulations |Microsoft and EY AI Skills Passport | AZURE AI Essential

EXPERIENCE

EDERA, MLOPs Engineer Intern | Remote (Pune, India) Feb 2026 - Present

- Built and deployed end-to-end ML pipelines using FastAPI and Docker, improving model deployment efficiency and reducing manual effort.
- Implemented CI/CD workflows and automated model retraining/monitoring, ensuring reliable and scalable production performance.
- Optimized model serving and integrated SHAP-based explainability, enhancing transparency and enabling data-driven decision-making.

Nirmaan Organization, AI/ML Trainer | Full Time (Pune, India) Sep 2025 - Present

- Delivered hands-on training in AI/ML concepts and tools, enabling students to build and deploy real-world machine learning models.
- Designed and conducted practical sessions on Python, data analysis, and ML algorithms, improving student understanding and project outcomes.
- Mentored students on end-to-end project development, including data preprocessing, model building, and evaluation.

Yorrams Tech Pvt.Ltd, Data Science Intern | Remote (Pune, India) Aug 2025 - Sep 2025

- Developed and fine-tuned 3 LLM-based models using scraped web data, improving domain-specific text understanding and response accuracy.
- Built data pipelines for web scraping, cleaning, and preprocessing large-scale textual datasets for model training.
- Evaluated and optimized model performance through prompt engineering and fine-tuning techniques, enhancing overall output quality and relevance.

SKILLS

Programming	Python, SQL, Java, Bash
AI/ML	NLP, LLM Fine-tuning, XGBoost, Scikit-learn , Neural Networks, LSTM, TensorFlow, Keras
MLOps & Deployment	Docker, FastAPI, CI/CD, Model Deployment, Monitoring
Data Analysis	Pandas, NumPy, Data Cleaning, Feature Engineering , Power BI, Matplotlib, Seaborn
Certifications	Intro to Generative AI, Microsoft and LinkdIn– (2025) AI for Management, NPTEL– (2026)

PROJECTS

END To END MLOps Pipeline for Real Time Fraud Detection

- Designed and deployed a real-time fraud detection pipeline using a Random Forest model integrated with FastAPI, enabling low-latency and scalable predictions.
- Built an end-to-end MLOps workflow with automated data ingestion, model retraining, CI/CD, and monitoring, ensuring high model reliability and continuous performance in production.

Face Recognition Attendance System

- Developed a real-time face recognition attendance system using deep learning and computer vision, enabling automated and accurate attendance tracking.
- Built an end-to-end pipeline including face detection, feature extraction, and database integration, improving efficiency and reducing manual errors in attendance management.

SafeSpace- Rape Safety Prediction

- Developed SafeSpace, a predictive web app using NCRB data to identify high-risk zones, with Random Forest achieving 90% accuracy and strong recall for reliable risk classification.
- Deployed an interactive Flask/Streamlit interface for real-time predictions and contributed to a research paper presented at SIBAR 2025.

RAG-Based Intelligent Document Q&A System

- Built a Retrieval-Augmented Generation (RAG) pipeline enabling interactive Q&A on PDFs using PyPDF2, SentenceTransformers, and FAISS for efficient semantic search.
- Integrated Flan-T5 for contextual answer generation and deployed a Streamlit-based interface for seamless document upload and user interaction.
